

MAHA XHIBITION

NEWS

Automechanika 2022

Welcome to our exhibition stand!

INNOVATION IS THE KEY

... and we have set off
fireworks for you!

- 01 IN-GROUND LIFTING TECHNOLOGY
- 02 C_MBT TRUCK CONNECT UNLIMITED BRAKE TESTER
- 03 TRUCKBAY PREFABRICATED TRUCK PIT
- 04 C_RGA MOBILE COLUMN LIFT
- 05 AXLE AND TRANSMISSION JACKS
- 06 LMS JOINT AND AXLE PLAY TESTER
- 07 MPC MAHA PARTICLE COUNTER
- 08 MSR 5000 MAHA SINGLE ROLLER DYNAMOMETER
- 09 MA STAR TRIPLE SAFETY TWO-POST LIFT
- 10 MLT 3000 MAHA LIGHT TESTER
- 11 EUSAMA PHASE SHIFT SHOCK ABSORBER TESTER
- 12 C_MBT CAR CONNECT UNLIMITED BRAKE TESTER
- 13 DUO CM SCISSORS LIFT
- 14 INNOVATION IN THE BOX
 $2 + 12 = 14$

Experience our
innovations as
you make your way
around our stand!

YOUR WAY AROUND OUR STAND:

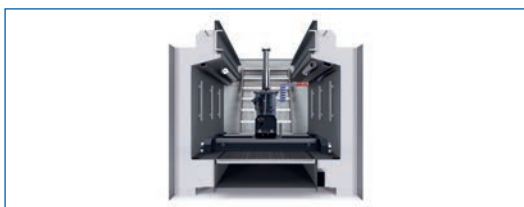

01 IN-GROUND LIFTING TECHNOLOGY

Tried and tested in-ground lifting technology with special supports for a wide variety of electric vehicles with patent-pending, spring-guided quick positioning.

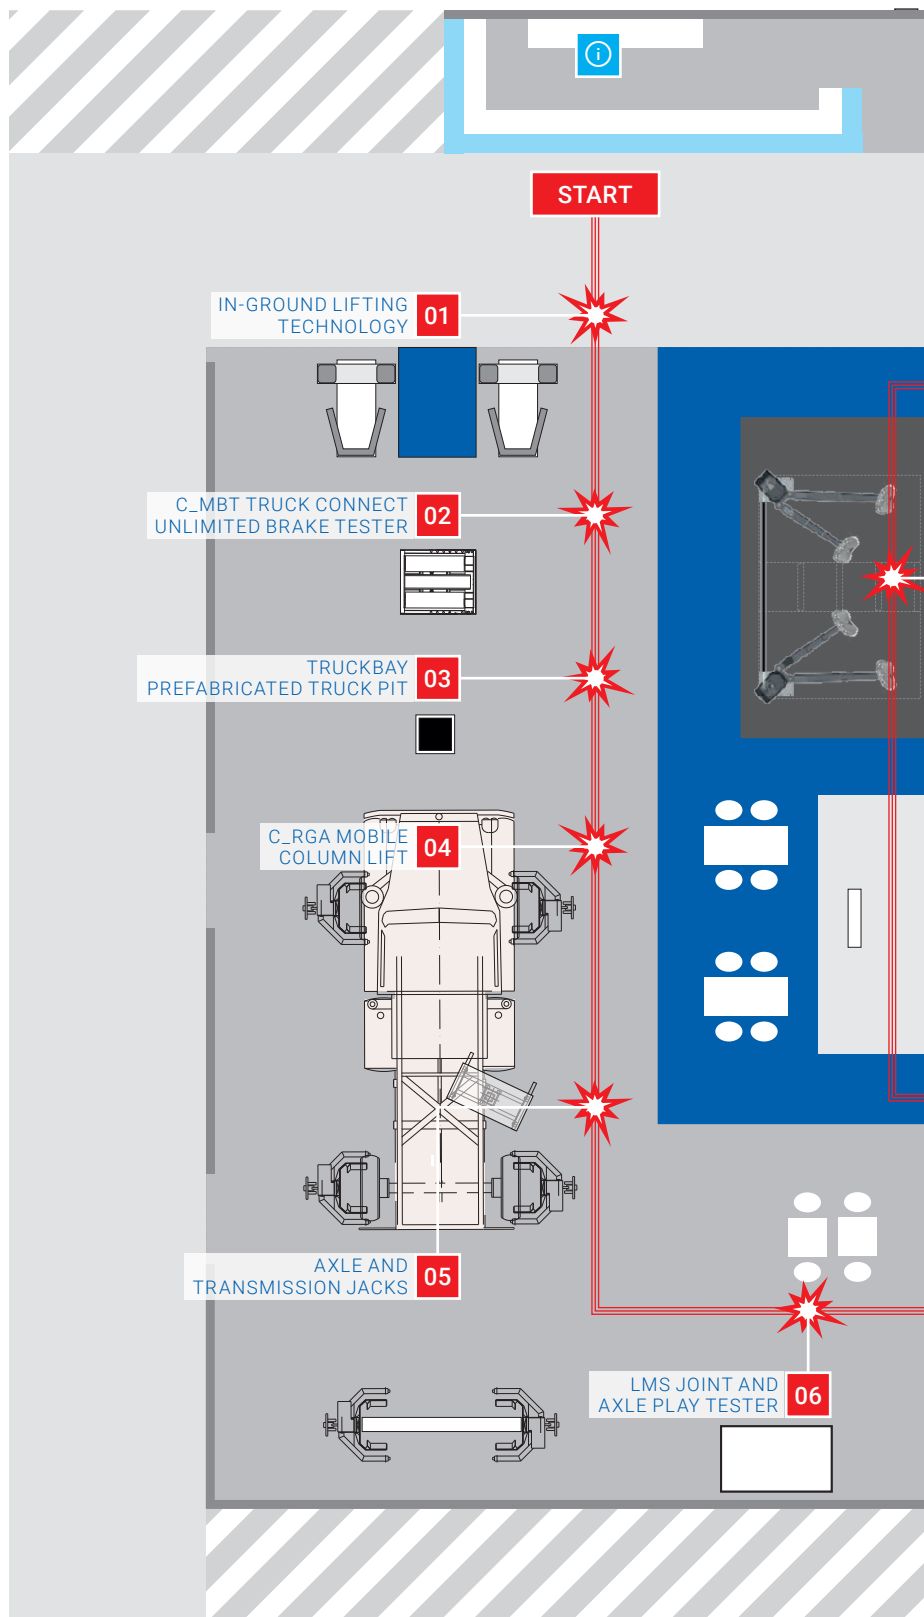

02 C_MBT TRUCK CONNECT UNLIMITED BRAKE TESTER

Brake tester TRUCK CONNECT – innovation of the decade – world’s first digital brake tester with state-of-the-art network technology – more details in our “Innovation Box”.

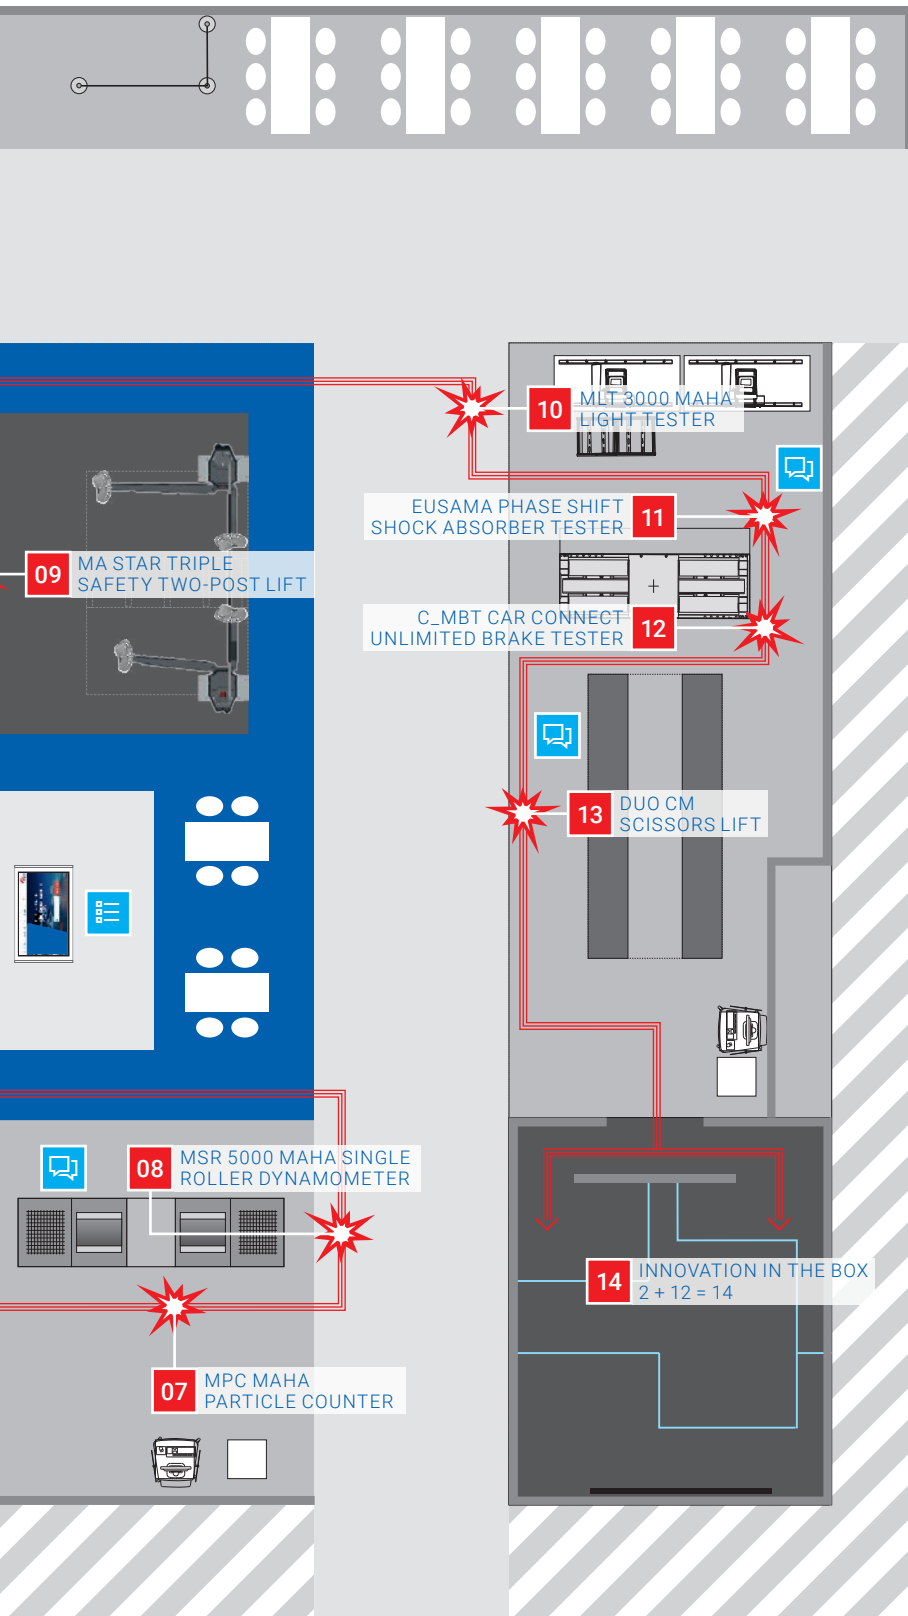

03 TRUCKBAY PREFABRICATED TRUCK PIT

Truck testing and working pit – tailor-made according to the customer’s needs, can be easily and quickly installed on site and combined with all kinds of equipment.

04 C_RGA MOBILE COLUMN LIFT

World’s first mobile column lift with lithium-ion battery technology and with unique, interference-free radio operation with double safety.

-  YOUR WAY AROUND OUR STAND

05 AXLE AND TRANSMISSION JACKS

Latest generation pit jacks with synchronised cylinder and Venturi nozzle, which guarantee safe and accurate work.

06 LMS JOINT AND AXLE PLAY TESTER

Truck axle play tester model with up to 20 t axle load, in which the current EU directive 2014/45/EU has already been implemented.

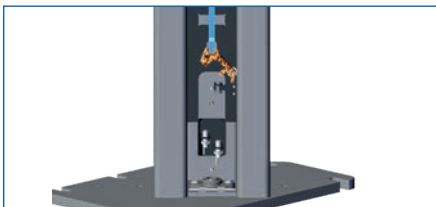

07 MPC MAHA PARTICLE COUNTER

State-of-the-art particle measurement counter for both diesel and gasoline vehicles, based on the operating fluid-free diffusion charging measurement principle.

08 MSR 5000 MAHA SINGLE ROLLER DYNAMOMETER

Performance meets precision – the completely new development is based on a PLC-programmed dynamometer and guarantees precise, reliable and reproducible measurement results.

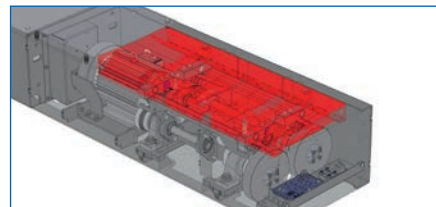

09 MA STAR TRIPLE SAFETY TWO-POST LIFT

Unique in design and safety – the two-post lift family MA STAR triple safety with 3.5 t, 5.5 t and brand new with 6.5 t load capacity.

10 MLT 3000 MAHA LIGHT TESTER

The redesign of the MLT 3000 is characterised in particular by the faster image processing of the new camera and can inspect the latest headlight technology.

11 EUSAMA PHASE SHIFT SHOCK ABSORBER TESTER

This new development meets the recommended specification of the EGEA (European Garage Equipment Association) and operates according to the phase shift principle.

12 C_MBT CAR CONNECT UNLIMITED BRAKE TESTER

Brake tester CAR CONNECT – innovation of the decade – world’s first digital brake tester with state-of-the-art network technology – more details in our “Innovation Box”.

13 DUO CM SCISSORS LIFT

DUO CM scissors lifts with two different runways, on the one hand according to the German directive for headlight testing stations, and on the other hand according to the new EU directive for axle play testers.

14 INNOVATION IN THE BOX 2 + 12 = 14

Come and see for yourself: the innovative technology of the CAR and TRUCK CONNECT series in combination with cutting-edge software technology in our “Innovation Box” – access only in the company of a MAHA employee.

THANK YOU VERY MUCH FOR YOUR VISIT AND TIME AT OUR STAND.
