## LIFTING TECHNOLOGY

December 2021

## The MA STAR success story continues

### Family complete – “BIG DADDY IS HERE NOW!”

- **At the end of the year, the world market leader completes the product family of the successful two-post lift MA STAR triple safety\*\*\*\*\* with “Big Daddy”. In addition to the well-known models MA STAR 3.5 and 5.5 with 3.5 and 5.5 tons, there is now also the MA STAR 6.5 with 6.5 tons load capacity.**

**Haldenwang 15<sup>th</sup> December, 2021.** The success story continues, and MAHA packs one more on top – “Big Daddy is here now”. Since December 2021, the MA STAR 6.5 is available for vehicles with a gross weight of up to 6.5 tons.

The head of the family thus closes the series of particularly safe and reliable two-post lifts. Like its predecessors, the MA STAR 6.5 shines with triple safety and five stars at very competitive value for money.

All other product advantages such as the stable column profile, the safety devices with support and safety nut, the “giraffe” nut breakage detection system and the motor brake integrated as standard have been consistently adopted. The intuitive operation, control and maintenance are thus identical and self-explanatory within the MA STAR family, which makes daily handling easier.

As usual, the customer can choose from numerous additional options. These include the LED lighting or the wheel engaging supports for special and electric vehicles. The latter allow unrestricted access to the underside of the vehicle and thus facilitate the removal and installation of vehicle batteries. The customer also has the choice between the MA STAR 6.5 “Stock” variant, which is available at short notice, and the “Comfort” variant. The latter is produced on customer request and offers extra accessories such as the patented support arm assist with double roller spring bearing, which ensures a particularly smooth extension of the support arms.

“Big Daddy”, the MA STAR with a load capacity of 6.5 tons, will be available to order from 10 January 2022.
