

LIFTING TECHNOLOGY MULTI-POST INGROUND LIFT

TRUCKLIFT 3/2 RS 14.0 VP 452093

TRUCKLIFT 3/2 RS 14.0 VP 452093

The multi-post lifting system, with three posts, lifts commercial vehicles and buses of up to 42 t. Two of the three lifting units are movable and equipped with a narrow roller cover and support crossbeam. The various vehicle reception positions can be conveniently stored and recalled using the automatic position-finding system. The robust aluminium roller cover consists of screw-free, smooth rolling jointed segments with a non-slip aluminium profile and can also be supplemented with a wider cover or crossbeam carrier. The torsion-resistant TRUCKLIFT double posts are designed to be self-locking.

PRODUCT DETAILS/ACCESSORIES

Description

Multi-post system with three lifting units, two of which are moveable, with surface-mounted vehicle support and narrow roller cover; modular design

- Flexible and custom-selectable post distance thanks to modular design of individual installation boxes
- Torsion protection through rigid dual post system
- Optimal operational safety thanks to redundant system with two separate hydraulic circuits and additional electronic pressure/leakage monitoring as standard
- Corrosion-resistant hydraulic piston; self-lubricating as piston dips into hydraulic oil with every lift
- Optional use of biodegradable mineral-based oil with long service life
- Space-saving medium-pressure hydraulic unit, mounted on the lifting units, travels with the moveable lifting unit (no hose routing or movement within the installation box)
- Low-noise operation thanks to ultra-quiet motor in the installation box
- Robust roller cover system with electric travel drive, made from pivot bearing aluminium profiles with non-slip surface
- Narrow roller cover with surface-mounted support, can be driven over with wheel loads of up to 4.0 t
- Electronic synchronous control of lifting units for uniform vehicle lifting (as per EN 1493), independent of varying vehicle pick-up point heights, and with robust inductive height sensor

system

- Two operating panels (incl. text display) for easy operation of central control and programming unit when moving the lifting units / lifting the vehicle
- High operational flexibility through different operating modes, including group and individual options, enables efficient work performance
- Position memory programme allows pick-up positions of up to 40 vehicles to be stored and recalled at any time
- Cable-connected remote control facilitates and speeds up exact positioning of vehicle take-up (20 m cable)
- Simple, integrated, pneumatically operated emergency lowering function; also usable in cases of power failure

Scope of delivery:

- · Three lifting units, two of which are movable, with S roller cover
- Support crossbar in anthracite grey (RAL 7016)
- 1 set of vehicle support sliders for forged axles with synthetic overlay (VZ 972343)
- 2 sets of hinged vehicle support sliders, height 220 (280) mm (VZ 972340)
- · Control cabinet and portable operating panel
- Pre-assembled cable harnesses per lifting unit, length 30 m
- Wiring and mounting materials
- Installation box/installation frame not included
- · Lockable main switch
- · Operating instructions
- CE declaration of conformity

TECHNICAL DATA

CE load capacity	42000 kg
Load capacity per lifting unit	800 - 14000 kg
Max. lifting height	2050 mm
Sliding post / fixed post	
installation depth	2523 / 2723 mm
Moveable lifting unit travel range	4020 mm
Support cross-beam width	1000 mm

Technical Datasheet / 06/12/2023

LIFTING TECHNOLOGY

MULTI-POST INGROUND LIFT

TRUCKLIFT 3/2 RS 14.0 VP 452093

TECHNICAL DATA

Post diameter	2 x 125 mm
Roller cover traversable with wheel load	4000 kg
Roller cover width	630 mm
Roller cover material	Aluminium
Lifting time / lowering time,	
load-dependent	approx. 60 / 60 s
Hydraulic oil volume (not included)	approx. 195 l
Operating pressure	70 bar
Control unit (H x W x D)	800 x 800 x 300 mm
Drive power	13.0 kW
gG Fuse	35 A
Power supply	3/N/PE 400 V 50 Hz

ACCESSORIES
